3. Availability and use.....	3

Annex A DigiCanTrain Project end of project leaflet (English)

# Purpose of the summary leaflet

The project leaflet (fact sheet) is a two-sided electric and printable information sheet. It describes the DigiCanTrain project and its key deliverables in the end of the project. The project consortium has approved the leaflet. (Annex A)

The leaflet describes the rationale of the DigiCanTrain project. It describes how the DigiCanTrain programme was developed, piloted, and the key results of the digital skills training programme for oncology-related health care professionals in strengthening confidence and capabilities in using digital interventions. The programme was co-designed by a European consortium of higher education institutions, research partners, hospitals, cancer and patient organisations.

The leaflet also contains a list of the partners, disclaimer and the contact details of project coordinator and the project website address.

The visual look follows the project visual appearance with the determined colours and fonts, the visual elements and the project picture and logo. It contains the EU emblem and disclaimer.

## Language versions

The project leaflet is available on the project website in the following languages: English, Estonian, Finnish, Greek, Romanian and Spanish.

## Availability and use

*The project leaflet is used to disseminate information about the project key results, the website and a contact person's details in each language area.*

*The language versions are published on the [digicantrain.fi](https://digicantrain.fi) website. Consortium partners have also PDF version for dissemination. Both the leaflets and the editable version are available in the Teams platform for the partners to utilise.*

# Digital Skills Training for Health Care Professionals in Oncology

Action: 101101253 – EU4Health Programme (EU4H-2022-PJ)

## Rationale of the DigiCanTrain project

Cancer care increasingly relies on digital tools, yet many healthcare professionals feel insufficiently prepared to use them safely and effectively.

DigiCanTrain addresses this competence gap by strengthening the digital skills of oncology professionals across Europe.

## What we did in the DigiCanTrain project

We developed, piloted and evaluated a digital skills e-learning programme for healthcare professionals working in oncology settings to strengthen their confidence and capabilities in using digital interventions.

The programme was co-designed by a European consortium of higher education institutions, research partners, hospitals, and cancer organisations.

# Facts on DigiCanTrain e-learning programme

Digi  
Can  
Train

Co-funded by  
the European Union

## DigiCanTrain e-learning programme

- Five core modules with multimodal content (videos, case examples, assignments and tests) for digital skills development, based on DigiCanTrain Digital Competence Framework.
- Flexible online delivery
- Credential options included ECTS, CME or micro-credentials (depending on country).

The content, quality and educational value of this activity have been reviewed by the Accreditation Council of Oncology in Europe (ACOE) in support of Continuing Medical Education (CME).

## Who Participated

The training reached healthcare professionals working in cancer care across six EU countries: Finland, Estonia, Spain, Ireland, Romania, and Greece.

Participants included nurses, physicians (specialists and general practitioners), allied health professionals, and non-clinical healthcare professionals.

## Key Results & Outcomes

### Capacity Building

We engaged 51 trainers and 168 participants from healthcare professionals across six countries. In total we recruited 843 HCPs and reached 794 HCPs who registered and completed part of the programme.

### Enhanced Competencies

- Increased confidence in using digital tools
- Improved understanding of digital workflows in oncology
- Strengthened ability to support patient-centred digital care.

### High- Quality Education Resources Developed

- Evidence-based curriculum
- Five training modules to be available for future use.
